We used a Prusa MK4 with the default Prusament PETG filament profile. To ensure your RAFT robot functions properly, please try to match these print settings on your own printer. While the mass doesn't need to be exact for every part, you should aim for the values listed in the table once your model is sliced. Note: Make sure to deduct the mass of any support material! Mass in the table is for the parts without any support material!

IMG	Part name	mass (g)	Infill type	Infill %	Layer h	Top layers	Bot layers	Perimeters
	**Gripper handle**	33	honey	25	0.15	6	5	3
	**Gripper trigger**	13	honey	25	0.15	6	5	3
	**Wrist**	12.7	honey	25	0.15	6	5	3
	**Lower arm**	23.7	honey	25	0.15	6	5	3

	**Elbow**	21.7	honey	25	0.15	6	5	3
	**Elbow lid**	7.6	honey	25	0.15	6	5	3
	**Upper arm**	15.6	honey	25	0.15	6	5	3
	**Shoulder**	13	honey	25	0.15	6	5	3
	**Shoulder lid**	7.8	honey	25	0.15	6	5	3

	**Base**	51	honey	25	0.15	6	5	3
	**Base lid**	5.7	honey	25	0.15	6	5	3
